

KEY TAKEAWAYS

Written by SeeKick from the facts below; every number it states is checked against them.

1'

A goal before City settled

Riccardo Calafiori scored at 1', handing Arsenal control before City had built any rhythm.

59%

Ball for City, goals for Arsenal

City had 59% possession and 12 shots to 9, yet both sides managed 5 on target.

Raya kept the door shut

David Raya made 4 saves, the difference between a comfortable win and a contest.

A reversal of recent meetings

City had won the last two meetings, 2-1 and 0-2 at Arsenal, before this.

TEAM COMPARISON

Full-match figures are the official match statistics. Footage figures are tracked automatically from the analysed video and are provisional.

ARSENAL	MANCHESTER CITY

ARSENAL

- Three different scorers: Calafiori at 1', Havertz at 28', Ødegaard at 48'.
- Ødegaard led the passing with 55 accurate passes from the number ten role.
- Ben White topped Arsenal's defensive interventions with 6 at right-back.
- Matched City's 5 shots on target despite only 41% of the ball.

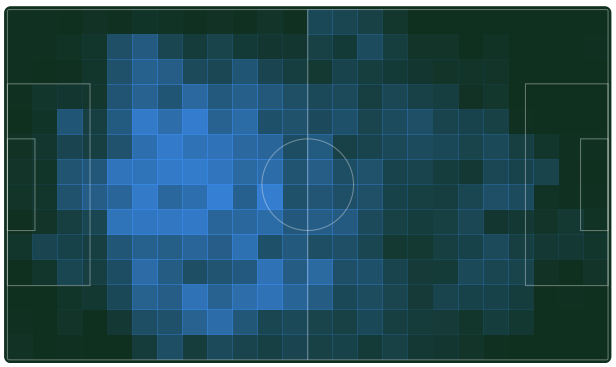

MANCHESTER CITY

- Dominated the ball with 59% possession but could not turn it into goals.
- Rúben Dias completed 70 accurate passes, most of the circulation running through him.
- Antoine Semenyo led City with 3 shots; nobody found a way past Raya.
- Erling Haaland was withdrawn at 53' with City already chasing the game.

WHERE THEY PLAYED

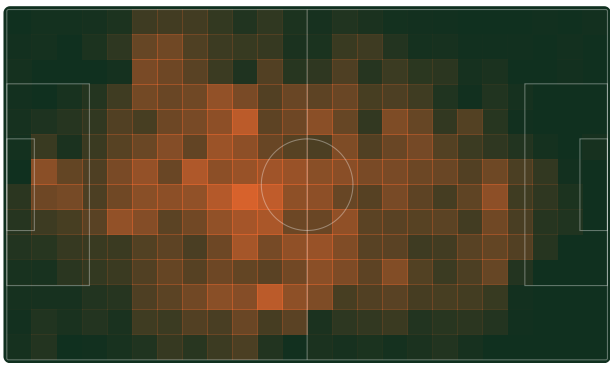

Heat maps count where each team's players were while the camera showed them (the camera follows the ball); which way each team attacked is not determined from this footage.

ARSENAL

on camera, replays excluded

MANCHESTER CITY

on camera, replays excluded

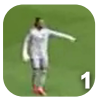

SQUADS

15 players were named in the video. Their cards add what the tracking saw: touches, passes and a reel of every touch (provisional). Click a player.

ABOUT THIS REPORT

- Tracking numbers - touches, passes, possession, distance and speed - cover only the analysed video (10 minutes) and only what the camera showed. They are provisional: checked by eye, not against ground truth.
- Distance and speed are measured only where the camera was solved from the pitch's painted lines; replays are excluded.
- Names come from shirt numbers read automatically and matched to the team sheets.
- High-speed running is distance at 19.8 km/h or faster, and a sprint is at least 25.2 km/h for 1 s: the men's speed bands (this module's men's bands (19.8 / 25.2 km/h = 5.5 / 7.0 m/s), 2026-10-10).
- Heat maps count where each team's players were while the camera showed them (the camera follows the ball); which way each team attacked is not determined from this footage.
