

REFEREE REPORT

SAMUEL BARROTT

referee · seen on 37 tracks

Arsenal 3-0 Manchester City · English FA Community Shield · 2026-08-16

MOVEMENT

provisional · on camera only

634 m
distance covered
141 m per min

17.7 km/h
top speed
brief spikes left out

34 m
high-speed running (≥19.8 km/h)
5.5% of distance

0
sprints (≥25.2 km/h, ≥1 s)
0.00 per measured min
likely under-counted

0
accelerations (≥3 m/s²)
0.00 per measured min

0
decelerations (≤−3 m/s²)
0.00 per measured min
likely under-counted

4.6 min
measured on camera
every figure here covers only these minutes

Measured only while the camera shows him and the pitch markings, with replays left out. These are not whole-match totals.

▶ How this is measured

DISTANCE TO THE BALL

provisional · on camera only

18.7 m
typical distance (median)

14–22 m
middle half of the time

58 %
of the time within 20 m

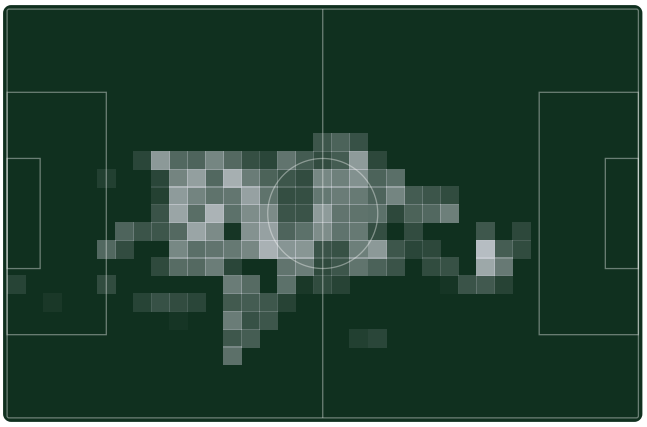

4.4 min
measured with the ball in view

Only frames where the camera placed both the referee and the ball on the pitch count. The camera follows the ball, so time far from play is under-represented.

WHERE HE WAS

provisional · on camera only

THE FOOTAGE · 4.8 MIN

Positions while the camera showed him, one map per half: the teams change ends at half time and which way each attacked is not determined from the footage, so the halves are never added together.

Assistant referees: 3.8 min measured on the touchlines, rows within 5 m of a touchline for a whole track segment are an assistant referee and are not in these numbers.

Arsenal 3-0 Manchester City · English FA Community Shield · 2026-08-16. Identified by kit colour and the detector, with any correction a person made in the viewer taking precedence. Tracked figures cover the analysed footage only, on camera only, and are provisional. Generated 11/5/2026.
